

CS75

The winch you wanted!

LOAD CAPACITY: 75Kg

SPEED: 2m/s

ACCELERATION: 2m/s²

WIRE ROPE: 4mm (black)

ZERO FLEET, PIVOTING PULLEY

AUTOMATIC LINE RECOVERY

DIMENSIONS: 84x29x55cm

FLEXIBLE

"Zero fleet" rope lead-off in 4 directions with pivoting pulley, which enables the rope to be moved up to 20 degrees off-axis in all directions.

Can be installed and operated both vertically and horizontally with a quick-lock hanging system on 4 sides with independent clamps, running on tracks and able to be positioned freely.

EASY TO HANDLE

Measuring just 84x29x55cm., weighing in at 84 kg. and with eight sturdy handles, the CS75 winch is unbeatably easy to handle and can even be installed on structures with limited capacity or where space is at a premium; prohibitive conditions for winches and chain hoists currently on the market.

INTERFACEABLE

If requested by clients, Series CS winches can also be supplied in other versions with even higher technical specifications, such as for example greater working load, speed and acceleration.

SCALABLE

I winch della serie CS possono essere forniti in altre versioni con specifiche tecniche più spinte come, per esempio, maggiore portata, velocità o accelerazione.

AUTOMATIC LINE RECOVERY

In 90% of the cases, the load to be lifted will require a power supply and a control signal: the CS75 winch can be fitted rapidly and practically with the CS75_Reel accessory, a synchronized rewinding system able to keep the line constantly tight, enabling to avoid risky and untidy cable coils typical of rewinding systems using sliders. The CS75_Reel is equipped as standard with a hybrid cable containing a 20A single-phase line and an Ethernet 1000BASE-T line, but other configurations are available on request.

SAFE AND RELIABLE

Designed in compliance with the very recently approved standard UNI EN 17206:2020 "Machinery for Stages and Other Production Areas" and the Machinery Directive 2006/42/CE, the CS75 winch is constructed with top-grade materials and components.

INVISIBLE

A total-black look, black wire rope, automatic line recovery system: The CS75 winch enables to realize impeccable tidy set-ups, certain of satisfying the expectations of even the most demanding Clients.
